</tbody>
</table>

Reasons for the change in the quantification of the substance.

No reasons – quantities approximately the same

Objective & Targets

AGC Automotive Canada Inc. prides itself on technological innovation in order to produce high quality products in an environmentally responsible manner. We will strive to optimize the use of lead at the facility. No options have been identified, and as part of the continuous improvement practices at the facility, technical advances will be monitored for new opportunities to reduce the use of lead in the future.

Progress in Implementing Plan

No feasible reduction options have been identified for implementation at this time.

For information on on-site releases from the facility, as well as disposal and off-site information please refer to National Pollutant Release Inventory’s website: http://www.ec.gc.ca/inrp-npri
As of July 31, 2020 I, Ryan Russell, certify that I have read the report on the toxic substance reduction plan for the toxic substance referred to below and am familiar with its contents, and to my knowledge the information contained in the report is factually accurate and the report complies with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under that Act.
