WIRED GLASS

As the world's largest glass manufacturer, AGC provides the widest range of glass products for both interior and exterior applications.

AGC offers wired glass in both polished and patterned options. Wired glass features square or diamond wire mesh embedded in the glass during the production process. It can be used as a fire-retardant by preventing the glass from shattering under stress or when exposed to high temperatures, keeping fire at bay and protecting people from smoke and flames. The industrial look dovetails perfectly with current trends in loft interiors and minimalist design.

Wired glass is ideal for cabinets, furniture, and decorative applications.

AGC is dedicated to providing world class service that is second to none, and can help you bring your next project to life with wired glass.
