## LACOBEL® & MATELAC™

As the world's largest glass manufacturer, AGC provides the widest range of glass products for both interior and exterior applications.

Two of our annealed, decorative, back-painted glass products are Lacobel, with a glossy finish, and Matelac, with a satin finish. AGC uses a factory-applied painting process that delivers a uniform and consistent finish for both products, and they are ready for cutting and fabrication. Utilizing our efficient industrial method eliminates the need for manual painting and lengthy dry times.

Both are available in 20 trendsetting colors and have a myriad of interior uses, including wall coverings, furniture, partitions, and sliding doors. Both products are UV-resistant and won't fade over time.

AGC is dedicated to providing world-class customer service that is second to none, and we are excited to help your next project come to life with Lacobel and Matelac.
