

## LACOBEL® T & MATELAC™ T

As the world's largest glass manufacturer, AGC provides the widest range of glass products for both interior and exterior applications.

Lacobel® T and Matelac™ T are two of our back-painted glass products that have a variety of uses, from wall coverings and furniture to facades and spandrels. Both products are temperable, meaning that the glass is strong, safe, and highly-resistant to heat, thermal shock, moisture, and UV, so it's suitable for use in interior and exterior applications.

AGC uses a factory-applied, back-painting process that delivers a uniform and consistent finish, offering the customer peace of mind for any project. Lacobel T has a glossy finish for a striking look, while Matelac T is acid-etched with a satin finish for a soft look. Both are available in 10 trending colors.

AGC is dedicated to providing world-class customer service that is second to none, and we are excited to help your next project come to life with Lacobel T and Matelac T.
