## CLEARVISION™

As the world's largest glass manufacturer, AGC provides the widest range of glass products for both interior and exterior applications.

Clearvision is the most transparent low-iron glass available today. It delivers remarkable clarity and a virtually colorless appearance with unparalleled light transmission and excellent color rendering. It also has a neutral, subtle edge color instead of the darker green hue seen with traditional float glass.

Ultra-transparent Clearvision is ideal for commercial interior, residential, and specialty applications, flooding interior spaces with light and providing outstanding visibility for a range of applications, including frameless and heavy glass shower enclosures, custom table tops, shelving, display cases, and more.

Clearvision makes it easy and fabricates like regular float glass and is available in a wide range of thicknesses from 1/8" (3mm) up to 1/2" (12mm). As an added bonus, it is also Cradle-to-Cradle™ Certified Silver.

AGC is dedicated to providing world class service that is second to none and can help you bring clarity to your next project with Clearvision.
